

# ROHS-directive

<b>Subject</b> ROHS directive			<b>Ref. No.</b>	<b>Page</b> 1 / 1
<b>Issued by</b> Bo Gyldmark	<b>Department</b> Quality	<b>Date</b> 2008-09-01	<b>Valid until</b> 2009-08-31	
<b>Recipient</b>				

This is to declare that the Brazed Heat Exchangers do not contain any hazardous substances according to RoHS European directive (2002/95/EC January 27<sup>th</sup> 2003).

A typical delivery of Brazed Heatexchangers including packaging consists of:

1. Plates and connections

Stainless steel 316 or 304 according to actual BHE product specification.  
Detailed specification in Material certificate.

2. Brazing material

Copper (Cu) Extreme pure copper (99,95%) used for brazing in vacuum.  
Detailed specification in Material certificate.

3. Plastics

Sticker. Topcoated metallized polyester film with acrylic adhesive  
UL approval MH 19823

Plastic covers. Plastic covers on connections are made of PELD

All plastics are approved for recycling or to fire in a local power/ heating plant.

4. Transport box

Transport box consists of waste wood, fibre board or corrugated cardboard.

## RoHS compliance

The RoHS directive 2002/95/EG is valid for electronic equipment and includes instructions for certain hazardous substances such as mercury, cadmium, hexavalent chromium, flame retardants PBB and PBDE etc. Alfa Laval has internal instructions for the control of chemical products used in the production in order to hinder the use of such substances.

As long as equipment is not dependent on electric current to work properly you are not obliged to follow the RoHS directive.
